1. The DM device ordered by the East German Buero fuer Wirtschaftsfragen from VEB Carl Zeiss, Jena, is an aiming mechanism (Richtgeraet) for artillery. The instrument is used to read off values needed by artillery weapons, after it has been adjusted for humidity, direction of wind, charge, direction of aim and other pertinent factors.
2. The instrument was developed in the Zeiss Fernr<sup>1</sup> (telescope) department. Production has not yet started.

1. Comment: German abbreviation for Fernrohr.
